

Full Steam Ahead

THE 'CLAN' PROJECT are proud to announce that the order for the assembly of the chassis of 72010 HENGIST has been placed, and that work has already commenced on the first phase of construction.

The contract to assemble the chassis has been awarded, after much deliberation and negotiation, to Sheffield based Engineering Group, CTL Seal. Many of the frame components were manufactured there, and CTL Seal were thrilled to be offered the opportunity to assemble the whole structure, seeing this as a prestige and historic project.

CTL Seal have previous experience working in the rail industry, and our choice of them has been approved by our Vehicle Acceptance Body, Wayne Jones and Partners, who visited the works some weeks ago for a guided tour.

Please keep coming back to our website for the latest information, and photographs of construction progressing.

**STANDARD STEAM LOCOMOTIVE COMPANY LIMITED and
CTL Seal Ltd**

– two companies with one vision –

A locomotive for the 21st century.
